# Table of Contents

<b>Preface</b> .....	<b>7</b>
Introduction.....	7
SWIG resources .....	7
About this manual.....	8
Credits.....	8
What's new? .....	9
Bug reports .....	9
SWIG is free .....	9
<b>Introduction</b> .....	<b>10</b>
What is SWIG?.....	10
Life before SWIG .....	10
Life after SWIG .....	11
The SWIG package.....	11
A SWIG example .....	12
C syntax, but not a C compiler .....	16
Non-intrusive interface building.....	17
Hands off code generation .....	17
Event driven C programming .....	17
Automatic documentation generation.....	18
Summary.....	18
SWIG for Windows and Macintosh .....	18
<b>Scripting Languages</b> .....	<b>21</b>
The two language view of the world.....	21
How does a scripting language talk to C?.....	22
Building scripting language extensions .....	26
Shared libraries and dynamic loading.....	27
<b>SWIG Basics</b> .....	<b>29</b>
Running SWIG .....	29
Simple C functions, variables, and constants .....	31
Pointers and complex objects .....	34
Getting down to business .....	37
Structures, unions, and object oriented C programming.....	42
C++ support .....	48
Objective-C.....	55
Conditional compilation .....	59
Code Insertion.....	61
A general interface building strategy .....	63

**Multiple files and the SWIG library ..... 68**

The %include directive .....	68
The %extern directive .....	68
The %import directive .....	69
Including files on the command line .....	69
The SWIG library .....	69
Library example .....	70
Creating Library Files .....	70
Working with library files .....	71
Static initialization of multiple modules .....	73
More about the SWIG library .....	73

**Documentation System ..... 74**

Introduction .....	74
How it works .....	74
Choosing a documentation format .....	75
Function usage and argument names .....	75
Titles, sections, and subsections .....	75
Formatting .....	76
Adding Additional Text .....	79
Disabling all documentation .....	80
An Example .....	80
ASCII Documentation .....	86
HTML Documentation .....	86
LaTeX Documentation .....	88
C++ Support .....	89
The Final Word? .....	89

**Pointers, Constraints, and Typemaps ..... 90**

Introduction .....	90
The SWIG Pointer Library .....	90
Introduction to typemaps .....	93
Managing input and output parameters .....	94
Applying constraints to input values .....	97
Writing new typemaps .....	98
Common typemap methods .....	102
Writing typemap code .....	104
Typemaps for handling arrays .....	105
Typemaps and the SWIG Library .....	107
Implementing constraints with typemaps .....	107
Typemap examples .....	108
How to break everything with a typemap .....	108
Typemaps and the future .....	108

**Exception Handling . . . . . 109**

The %except directive. . . . .	109
Handling exceptions in C code. . . . .	109
Exception handling with longjmp(). . . . .	110
Handling C++ exceptions . . . . .	111
Defining different exception handlers . . . . .	112
Using The SWIG exception library . . . . .	113
Debugging and other interesting uses for %except. . . . .	114
More Examples. . . . .	114

**SWIG and Perl5 . . . . . 115**

Preliminaries . . . . .	115
Building Perl Extensions under Windows 95/NT. . . . .	118
Modules, packages, and classes . . . . .	120
Basic Perl interface . . . . .	120
A simple Perl example . . . . .	123
Accessing arrays and other strange objects . . . . .	127
Implementing methods in Perl . . . . .	130
Shadow classes . . . . .	131
Getting serious . . . . .	133
Wrapping C libraries and other packages. . . . .	138
Building a Perl5 interface to MATLAB . . . . .	138
Handling output values (the easy way). . . . .	142
Exception handling . . . . .	143
Remapping datatypes with typemaps . . . . .	144
The gory details on shadow classes . . . . .	153
Where to go from here? . . . . .	159

**SWIG and Python . . . . . 160**

Preliminaries . . . . .	160
Building Python Extensions under Windows 95/NT . . . . .	162
The low-level Python/C interface. . . . .	164
Python shadow classes . . . . .	168
About the Examples . . . . .	170
Solving a simple heat-equation. . . . .	170
Wrapping a C library . . . . .	178
Putting it all together. . . . .	188
Exception handling . . . . .	190
Remapping C datatypes with typemaps . . . . .	193
Implementing C callback functions in Python . . . . .	203
Other odds and ends . . . . .	206
The gory details of shadow classes. . . . .	207

<b>SWIG and Tcl</b> .....	<b>215</b>
Preliminaries .....	215
Building Tcl/Tk Extensions under Windows 95/NT .....	218
Basic Tcl Interface .....	220
The object oriented interface .....	223
About the examples. ....	226
Binary trees in Tcl. ....	226
Building C/C++ data structures with Tk. ....	231
Accessing arrays .....	233
Building a simple OpenGL module .....	234
Exception handling .....	238
Typemaps .....	239
Configuration management with SWIG .....	251
Building new kinds of Tcl interfaces (in Tcl). ....	257
Extending the Tcl Netscape Plugin. ....	260
Tcl8.0 features. ....	262
<b>Advanced Topics</b> .....	<b>263</b>
Creating multi-module packages .....	263
Dynamic Loading of C++ modules .....	267
Inside the SWIG type-checker .....	268
<b>Extending SWIG</b> .....	<b>271</b>
Introduction. ....	271
Compiling a SWIG extension .....	272
SWIG output .....	273
The Language class (simple version) .....	273
A tour of SWIG datatypes. ....	279
Typemaps (from C). ....	286
File management. ....	288
Naming Services .....	289
Code Generation Functions. ....	289
Writing a Real Language Module. ....	290
C++ Processing .....	304
Documentation Processing .....	306
The Future of SWIG .....	309
<b>Index</b> .....	<b>310</b>
